PLAIN SLICED GUM

QUARTERED FIGURED HONEY TREE

PLAIN SLICED TEAK

BLOCK MOTTELED MAKORE

## Designer Colors

Wood is a natural material with character, color and grain pattern which varies, even in the veneers taken from the same tree. Since the veneers on this page have been photographed, their actual color and grain may differ from what you see here. For these reasons, we request that you order stained veneer samples for a closer approximation of actual appearance.

• All species on this page are shown with clear Enviroclad UV finish.
