- White to creamy white

Pattern

- Straight, close grained;
sometimes wavy or curly to
highly figured; fine texture

Characteristics

- Heavy, hard, tough

Designer Colors

Wood is a natural material with character, color and grain pattern which varies, even in the veneers taken from the same tree. Since the veneers on this page have been photographed, their actual color and grain may differ from what you see here. For these reasons, we request that you order stained veneer samples for a closer approximation of actual appearance.

Do not use these images to make final color selections
