Designer Stains Available at Local PPG Stores

In cooperation with PPG, Marshfield DoorSystems has made our Enviroclad UV® Designer Colors available at local PPG paint stores. **This stain can be used for field repair and to stain other trim work to match factory finished Marshfield DoorSystems doors.**

This is how it works:

- Check the Yellow Pages or call 1-800-441-9695 for the nearest PPG store that handles PPG's Architectural Finishes, specifically Olympic® stains. Follow the automated prompts to locate a dealer near you.
- To save time it is recommended that you call the store with your request so they can verify the formula and they have the necessary base materials. The base material is Pittsburgh Paints Brand Olympic® stain base 44500. This mixing base is lower in VOCs (Volatile Organic Compounds) and HAPS (Hazardous Air Pollutants) than stain base 77-560 that it replaces. Should the store location you contacted have any questions regarding the stain, please refer them back to 800-441-9695 extension 4 where a PPG representative will assist them. Please do not request the stain formulas, as they are proprietary. Some State, County or municipality regulations may limit container sizes but not quantities.
- Pick up the stain. Color strength may vary based on the wood species used. **The painter must use the approved door samples as a guide for the color range on the other woodwork.** In order to achieve the color allow the stain to penetrate the wood, time will vary by species and color. Neither Marshfield DoorSystems nor PPG are responsible for the final stain color or finish.
- Pittsburgh Paints Brand Olympic® clear coat systems recommended for application over the Olympic® stains are:
 - OLYMPIC® 41060 Premium Interior Oil-Based Sanding Sealer
 - OLYMPIC® 43886 Premium Interior Oil-Based Polyurethane Satin

 - OLYMPIC® 41061 Premium Interior Water-Based Sanding Sealer
 - OLYMPIC® 42786 Premium Interior Water-Based Polyurethane Satin

You can specify and use our Enviroclad UV factory finished doors with confidence knowing that Marshfield DoorSystems and PPG have eliminated the hassle associated with matching project woodwork and trim to factory finished doors.
