

# TECH UPDATE

## **New LTL Packaging Procedure**

Marshfield DoorSystems has implemented a new LTL packaging design in order to increase protection during transit of your doors. The improvements to the package include:

- Wood pallets rather than corrugated pallets – this change will reduce collapsing or breaking of pallets as well as enable loads to be moved with pallet jacks. The wood pallets will also be over-sized (wider than the doors) to prevent forklift damage.
- Stretch wrap rather than metal banding – This change will prevent door edges from being damaged and lock pockets from being broken by the metal bands.
- Improved corner protection – To reduce the number of doors with damaged corners.

We'll monitor the results closely and implement further improvements if necessary. If you have any questions please contact your Inside Sales Representative at 800-869-3667.
