

Field Finisher's Responsibility Form

The Marshfield DoorSystems warranty does not cover the appearance of field-finished doors regardless of defect. If Marshfield DoorSystems factory finishes the doors the defect would have been detected prior to shipping. Marshfield DoorSystems assumes the responsibility for the appearance of the wood doors when they are finished based on the approved sample.

It is the field finisher's responsibility to achieve an acceptable appearance.

To **reduce** the problems and risks associated with field finishing of wood doors, we recommend the following:

- Before finishing a wood door it must be completely block or power sanded, in a horizontal position with the grain. Use 100 to 150 grit sandpaper to remove raised grain and handling marks.

It is not unusual for this to be a 20 to 30 minute process.

- Finish must be applied when the door is in a horizontal position.

To **eliminate** the problems and risks, lower the costs, and increase the quality of a finished wood door, we recommend the following:

- **HAVE THE DOORS FACTORY FINISHED BY MARSHFIELD DOORSYSTEMS!**

Please check one of the following and sign below:

_____ We have read and understand the above and have elected to have the doors field finished as instructed above.

_____ We would like to investigate the options of factory finished doors. Please provide a price to finish the doors with one of Marshfield DoorSystems' Designer Colors.
